

Description

An acrylic-based, one-component resurfacer.

Application

- Is acrylic-based, one-component resurfacer for basketball, tennis, volleyball and handball courts.
- It helps improve the appearance of rough sports fields and makes them smoother.
- It reduces the costs of repairing sports fields.
- It provides perfect ball bounce and safe play.
- It has weather-resistant properties.

Technical Data

Test	Result
Appearance	viscous liquid
Colors	Beige - off-white - grey
Density (Kg/m ³)	1.75 - 1.85
Viscosity (cps)	100 – 3500 mPa.s at 25°C
Walkability	after 1 day
Temperature for the application and drying of the material	35°C

Packaging

Supplied in 75 kg drum packages

Storage

12 months in unopened containers in dry places with minimum temperature 5°C and maximum temperature 30 °C

Consumption

2 - 3 kg/ m² in two or three layers

Application Instructions

Substrate

The level, dry, clean, and free of cracks, undulations, and dust solid substrates must have in order to ensure proper adhesion. On dry surfaces without rising humidity issues

Preparation Work

Before beginning installation, the substrate's surface needs to be thoroughly cleaned with a brush. Before beginning installation, minor inclinations must be leveled.

Application

- Surface priming to ensure appropriate subfloor adherence.
- Saturating the surface with one or more layers of application.
- Prevent the accumulation of the substance in puddles.
- Resurfacer is applied in one or more layers, depending on the required thickness, porosity, and roughness of the subfloor, to seal the porosity of the subfloor once the primer starts to dry—one hour, on average, depending on ambient temperature. Applying is done with a squeegee.
- Depending on the kind, level of absorption, and roughness of the underlay, consumption ranges from 2-3 kg/m² in two or three layers

Cleaning

Tools should be cleaned with water immediately after use.

Health and Safety

- The application must take place in well-aired places using protective gloves
- Skin or eye contact must be avoided, otherwise wash carefully with soap and water.
- Do not dispose directly to water or soil. Burry in landfill in accordance with the local regulations.
- For further information, request material safety data sheet (MSDS) for the product
